

American Health Associates

American Health Associates Imaging Services

“This is a **Partnership** as much as a Service.”

American Health is one of the nation's oldest private independent laboratories with over 30 years' experience of delivering rapid, highly effective laboratory services to the long-term care industry. The company has evolved a platform diagnostic offering that allows its staff to rapidly acquire and result both laboratory and now radiology service requests within long-term care facilities and other congregate settings. The company is rapidly scaling its offering across the United States to both match its laboratory service footprint and beyond.
